BECKLAR®

Staff Duress, Solved.

Protect Your People, Respond in Seconds.

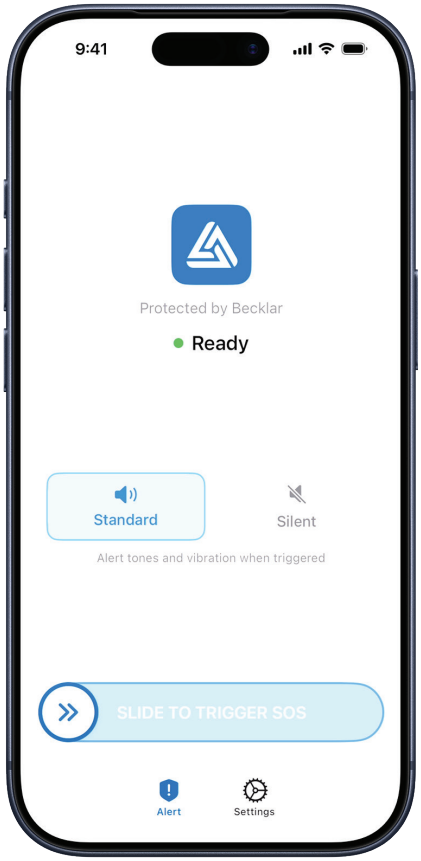
Turn your staff's existing devices into a complete duress system – now available in Connection Hub on Epic™ Showroom.
No badges. No new hardware.

Healthcare Workers Deserve Better

Workplace violence in healthcare is an epidemic. Healthcare workers are five times more likely to experience violence than other occupations and traditional badge systems are not solving the problem.

A Smarter Approach to Staff Duress

Becklar's Workforce Safety delivers real-time staff duress protection, rapid response capabilities, and seamless integration with tools your teams already use in hospitals, high-risk environments, or on the road.



Key Capabilities

Instant Duress Alert

Trigger alerts instantly using iPhone Action Button, Siri, Apple Watch, SOS slider, or Bluetooth button.

Room-Level Location Awareness

Pinpoint the exact location of an incident for faster, more accurate response.

24/7 Professional Monitoring

Trained monitoring professionals coordinate emergency response when seconds matter.

EHR Integration

Epic™ Toolbox designated. FHIR Device, auxiliary-function, and Task. Read enable alerts through Rover™, Haiku™, Canto™, and Hyperspace™.

Multi-Tier Escalation & Workflow Automation

Customize alert routing, escalation paths, and notifications–ensuring every alert gets a response.

Data & Reporting Insights

Gain visibility into incidents, response times, and trends to improve safety outcomes.

Built for Healthcare: Now Available in Connection Hub on Epic™ Showroom

Built for Healthcare: Epic™ Integration

Becklar's Workforce Safety solution has successfully integrated with Epic, enabling staff duress capabilities within the systems clinicians use every day.

What This Means for Your Organization

Embedded Safety in Clinical Workflows
Initiate alerts directly within Epic—no need to switch applications.

Faster Response Times
Alerts are routed instantly with staff identity and location.

Improved Adoption & Ease of Use
Familiar interfaces reduce training time and increase utilization.

Streamlined Operations
Centralize safety workflows without adding IT complexity.
